Patented in 1919, the “victory joint,” a revolutionary innovation that allows pipes to be coupled or joined without threading or flanging was adopted by a wide range of industries and, in 1925, Victaulic Company of America was founded. Derived from the words victory and hydraulic, Victaulic continues to craft unconventional solutions that exceed customer and industry expectations.

Victaulic is the originator and world’s leading producer of mechanical pipe joining and flow control solutions.
